Designs with individual texts should be delivered with the font files (.ttf or .otf). The font has to be checked by the customer if all the letters are available in the desired font. For example á, ä, ç, é, ë, ö,ô, š.
Fonts where these special characters are not available the special characters will be automatically replaced by a standard font.

When the individual image covers the whole product make sure the text and logo's are kept at least 2 mm from the border and the background has a bleed of 2 mm.

Below you find some examples how the individual orders should be provided. In the colomn of the individual images only normal characters can be be used, no special characters like á, ä, ç, é, ë, ö,ô, š.

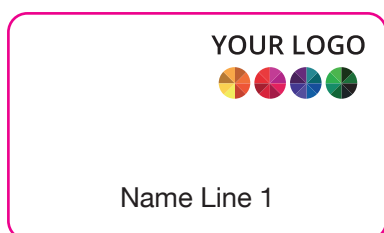

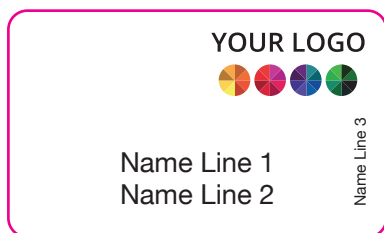

Designs with an individual text on 1 line.
Excel file should be made as below:

|	A	B
